Ketchikan clutches the shores of the Tongass Narrows, with many shops and houses built right out over the water. The stairways are weathered and the vibe is cheerful in the town that calls itself the Salmon Capital of the World. The main attractions – Creek Street, the Tongass Historical Museum, Totem Bight State Park and Saxman Village.

Tracy Arm a narrow, twisting, 30-mile-long fjord that ends at the twin Sawyer glaciers. Lush rain forest recedes to reveal bare rock, and verticality predominates: 7,000-foot peaks, sheer rock faces, waterfalls at every turn. And tucked away at the end of this remarkable waterway are two very active reminders of the Ice Age – the twin Sawyer Glaciers, calving icebergs into the jade-colored inland sea.

Juneau; The state capital, surrounded by the lush Tongass National Forest and with Mendenhall Glacier at its back door. try a **tram ride** - to the top of **Mt. Roberts**, or a feast at at Taku Glacier Lodge via **floatplane**. Enjoy a **Whale watch excursion** with a visit to the **Mendenhall Glacier** or try a **flight seeing** excursion

Icy Strait Point stretches for a few hundred meters along the beach; the old wooden buildings, bright red in the endless green of the Tongass, now offer a museum and a cannery demo. But more interesting is simply the madness of scale. Icy Strait Point gives a chance to look into history to see where Alaska's money came from. Try Halibut fishing, a Kayak Adventure or a wildlife and Brown Bear search.

Homer On southern Kenai Peninsula, Homer is located on the pristine waters of Kachemak Bay and Cook Inlet, in the shadow of the Kenai Mountains. Homer boasts the geographical anomaly that locals call "The Spit." 15,000 years ago, a glacier covering Kachemak Bay pushed a five-mile long gravel bar toward Cook Inlet. After the glaciers retreated, this bar remained.

Kodiak; Kodiak Island has been home to the Alutiiq people for more than 7,500 years, but its most famous inhabitant is surely the enormous sub-species of grizzly known as the Kodiak brown bear. Some of these giants weigh 1500 pounds and stand ten feet tall. Kodiak also boasts legendary fishing, the noticeable influence of historic Russian America, and spotless green fjords.

Hubbard Glacier has been an irresistible cruise attraction ever since the 1880's. The glories of monumental glaciers are close at hand. Magnificent in repose, they thrill the spectator with thundering cataclysms as towering pinnacles of electric-blue ice tumble into the sea. When an iceberg is born, the sound is like thunder. You relish every moment, marveling at the sights and sounds of calving glaciers.

Sitka; The onion domes of St. Michael's Cathedral a reminder that Sitka was once a key Russian settlement. Indeed, it was capital of Russian America, seat of the bishop of Kamchatka, and the most important port on the West Coast for the first half of the 19th century. See a performance by the Archangel Dancers, be greeted by native Tlingit people, stand where the United States took possession of Alaska in 1867.

Victoria is a city that spent a roustabout adolescence as a main port for gold prospectors and opium traders, and then transformed itself into an icon of British gentility after the completion of the trans-Canada railroad put Vancouver in the ascendant. Butchart is a collection of gardens more than a single garden -- highlights include the Sunken Garden, the Italian Garden, the Japanese Garden, and the Rose Garden.
